

Time to move to safe alternatives.....

Modern Farming

- Chemical Fertilisers
- Chemical Pesticides
- Hybrid Seeds
- Excessive Water Use
- Exorbitant Costs
- Deteriorating Productive Resources
- Diminishing Returns
- Farm Suicides

Mother Nature plundered and poisoned.

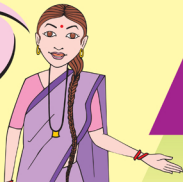

Poisonous Food

Consumers are getting unsafe food. Meanwhile, farmers are getting poisoned, find their costs increasing and pests building up. It is time to stop this.

Let us turn towards organic and create a win-win situation for everyone

The alternative is Organic food

Organic Farming

There is science behind organic farming. It is based on Nature's processes and products. It is affordable, viable and safe. It rests on healthy soils, ecological balance amongst pests and predators, water conservation, locally adapted diverse, productive seeds
